Product Description

The Citadel Colour Painting Handle XL features a well-balanced, ergonomic base that fits comfortably in the palm of your hand. The massive spring-loaded clip securely grips bases ranging from 50mm all the way up to 170mm oval bases.

The Painting Handle XL has been expertly designed to work with a range of modular hobby tools to enhance your painting and modelling experience. The base slots securely into the Citadel Colour Assembly Stand to keep even the largest models secure while you work.

The flexible arms from the Assembly Stand also fit neatly into eight sockets located around the edges of the extra-large clip, allowing you to keep components in place while you build models. The same sockets are also sized to accommodate Sub-assembly Holders, so you can keep your colours consistent even when painting large, complicated projects.
